

Year 6 Blog - 27.3.2026

It has been another busy week in Year 6, filled with creativity and enthusiasm for learning.

We have had an exciting week in our science learning, where we have been exploring the topic of light. The children investigated how light travels and how it can be reflected using

mirrors. They then applied their understanding by designing and making their own periscopes. It was fantastic to see them working collaboratively, thinking carefully about angles and reflections, and showing great creativity in their designs.

In addition to this, we have been busy practising for our upcoming Easter assembly in church. The children have been learning their lines, songs and actions with great enthusiasm. It has been lovely to see their confidence grow as they rehearse, and they are working hard to ensure the performance is something really special. We are very much looking forward to sharing this with you.

Alongside our normal lessons, Year 6 have also continued to work very hard in their SATs morning groups. The children have shown fantastic focus and determination, and we are really proud of the effort they are putting into their learning.

We would also like to encourage you to visit the PAN art exhibition in the town centre, where some fantastic artwork is being displayed. It would be wonderful for the children to see their community celebrating creativity, so do pop along if you get the chance

Well done, Year 6, for another brilliant week!

Thank you

Miss Nesbitt
